

# Healthcare

## Program Aim

The purpose of the Healthcare Program is to promote the education and exploration of construction trades careers among high school students by providing the technical skills and knowledge necessary to make career decisions in this field.

## Program Components

This program is a collaborative effort between three area high schools and Mesabi– Range Community & Technical College. This combined effort helps to build a more skilled, educated workforce through programs like this.

For more information about Mesabi-Range Community & Technical College ALI courses contact Carol Helland at [c.helland@mr.mnscu.edu](mailto:c.helland@mr.mnscu.edu), 218-749-7715 or Jennifer Willard at [j.willard@mr.mnscu.edu](mailto:j.willard@mr.mnscu.edu), 218-744-7524.

Applied Learning Institute (ALI) was formed in 2006 to enhance technical education in northeast Minnesota by providing experiential learning that combines hands-on training and technology. The result will be highly qualified, knowledgeable workers who are equipped with the technical and problem-solving skills needed by employers everywhere. Having completed the pilot phase, ALI entered its first full-implementation year during the 2009-10 school year. ALI is a partnership connecting 17 northeast Minnesota school districts and the five colleges of the Northeast Higher Education District (NHED), a member of the Minnesota State Colleges and Universities System (MnSCU).
